PROSERVICES

What does the service provide?

With deployment management service, you can take greater control of your Toughbook-based solutions. Packaging the constituent parts of an overall solution into one carton ensures that it arrives ready to perform – without the need for multiple deliveries or waiting times as different parts are delivered independently.

The packaging service is carried out in our Toughbook configuration center before being supplied to you on your premises.

What are the benefits?

- **Greater control** – the supply chain is simplified with our deployment service – entire solution can be monitored whilst in transit and at the point of delivery.
- **Easier inventory management** – bundles items can be recorded and managed whilst in your warehouse without concerns about loss, misplacement or incomplete inventory.
- **Easier distribution** – because the solutions are packaged in their entirety, they're far easier to deploy throughout your organization.

PRODUCT CODE	SERVICE	DETAILS
CFDSPM	Solution packaging – include up to 10 specific items in a carton box.	Pack all items in one solution (Does not include custom designed case.)
