PROSERVICES

What does the service provide?

Our Disk Image Management services gives you an easy, efficient and proven way to centralize image management and have your Toughbooks arrive ready with you for deployment. Because the imaging is managed centrally, you can be certain that all software on your Toughbooks is consistent and up-to-date – and easily altered or adapted should the need arise. In short, it's the ideal solution for reducing the burden on your IT department, for smoothing the rollout of new hardware and reducing the cost and effort of software installation.

What are the benefits?

→ **Instant productivity** – your Toughbooks arrive 'ready to go', equipped with precisely what your organization needs.

→ **Guaranteed consistency** – because we create and deploy the desired disk image before we supply the Toughbooks to you, you can be sure that all software will be 100% consistent as it is rolled out.

→ **Reduced downtime** – centrally managing your disk imaging means the burden on your IT department is reduced and any in-warranty repairs that require re-imaging of the hard drive can be done at the same time.

→ **Smoother, quicker rollout** – the extremely process of installing software onto multiple devices across your organization is bypassed completely.
