**PROSERVICES**

With the right mobile computing solution, warehouse and material-handling operations can achieve so much more.

Thanks to mounted mobile computers on forklift trucks, operators can now go about their daily picking and putting-away tasks, while connected to back-end host systems.

This allows operators to have all the information they could possibly need at their fingertips in order to increase productivity and minimize errors.

Selecting the right mobile computing solution is critical to success.

It's important to select a device that's flexible, truly mobile and rugged enough to withstand the demanding environments in which it may be used.

Panasonic's range of ruggedized Toughbook and Toughpad mobile computing solutions are the perfect fit.

## Rugged from the inside out

Drop-tested at 180cm from 26 angles, vibration-tested to ensure operation in unsprung vehicles, and capable of withstanding extreme temperatures, our devices are robust enough to work exceptionally in the sector's typically challenging workplaces.

## Work without limits

With glove- and rain-enabled touchscreens that are anti-reflective for sunlight readability, our IP-rated devices allow operations to keep moving. Indoors or out. Whatever the weather. Whatever the hour.

## Latest systems and technology

Choose from the latest Windows or Android™ OS, and the most current Intel® processors.

## Optimized connectivity

Where other devices fail, Toughbook and Toughpad solutions stay connected. Our models offer combinations of LAN, wireless LAN, Bluetooth, WWAN (3G/4G) and GPS, and our vehicle docks offer optional dual antenna pass-through to further enhance connectivity.

## Ergonomic mobility

Ergonomically designed and rigorously tested, our fully-rugged and flexible vehicle docks and mounts provide a complete, safety-compliant solution that's easily transferable between forklifts.

## Dedicated accessory range

From barcode scanners and RFID readers, to security and connectivity-enhancing software, all accessories are tested and certified by Panasonic to Toughbook and Toughpad standards, guaranteeing full compatibility.

## Specialist support and services

Panasonic ProServices offers value-added professional services that include managed deployment, technical support, asset management and user training, ensuring your project is rolled out smoothly and successfully.
