

MOBILITY SOLUTIONS FOR LAW ENFORCEMENT

RUGGED DEVICES, SOFTWARE AND SERVICES. PURPOSE-BUILT FOR THE WORK YOU DO.

Tough Enough To Protect And Serve Your Officers

Equip officers with rugged mobile solutions that can speed informed decision making, automate routine processes such as license checks and ticketing.

Customizable Solutions

Our customizable mobile solutions combine purposebuilt computers, software, connectivity and services. They're designed to be easy to use, put data directly into officers' hands, deploy quickly and keep officers safe.

Devices: Built for the World's Toughest Users

Panasonic TOUGHBOOK devices—rugged laptops, 2-in-1s, tablets and handhelds—are durable, reliable and engineered to withstand drips, drops, dust, grime and more. To ensure that they perform flawlessly every time your officers need them, TOUGHBOOK rugged computers undergo more than 500 checks and tests, including military standards testing.

Software: Support for law enforcement applications

Panasonic supports an entire suite of law enforcement applications for accelerated response and community support. Devices can be configured to handle data retrieval programs, run license plate numbers, deliver on-the-spot tickets, scan drivers' licenses, or organize case details and evidence.

Connectivity: Reliable and Always On

Keeping your officers connected depends not only on the quality of the network, but on the quality of your mobile device. Panasonic manufactures and tests its own antenna modules, built with exceptional reliability and connectivity reach. Choose from options for Wi-Fi, Bluetooth® and mobile broadband with satellite GPS.

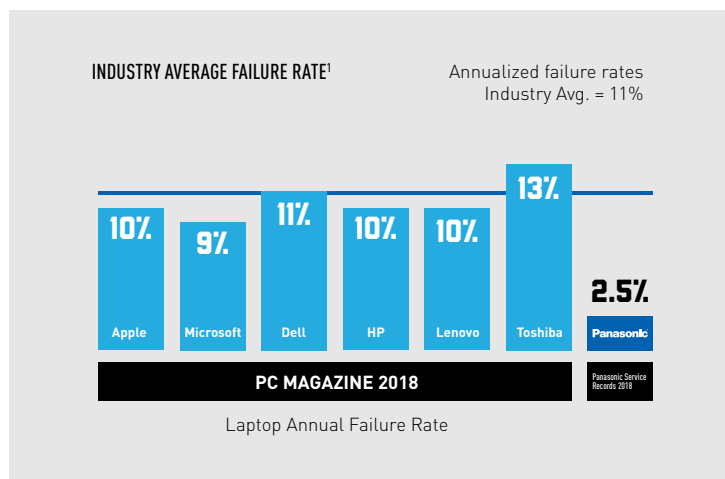

Services: Planning, Deployment and Repair

TOUGHBOOK devices are backed by a strong warranty program and the industry-leading ProServices team. ProServices offers a Canadian based support network with rapid turnaround on repairs and access to specialized services and knowledgeable experts.

Take advantage of our deployment services to ensure that everything from the software to third-party accessories to the battery is configured and fully tested. Our expert vehicle mounting services can customize installations for your vehicles, making it easy and safe to store and transfer your device.

A smart investment

In situations where failure is not an option, Panasonic devices are more than five times more reliable than the average laptop used by businesses across North America,¹ lasting longer and contributing to a low total cost of ownership.

¹ Based on a comparison of Panasonic actual data for our TOUGHBOOK family of devices to PC Magazine reader-reported data for competitors, 2018.

Panasonic TOUGHBOOK Solutions For Law Enforcement

Panasonic offers a broad range of devices. The following are three of our most popular models, purpose-built for law enforcement with reliability that helps officers access data and apps, while staying in touch with headquarters and other community agencies. Each comes with wireless options that include Wi-Fi, Bluetooth® and 4G LTE multi-carrier mobile broadband with satellite GPS.

Panasonic TOUGHBOOK CF-33

Use the TOUGHBOOK 33 in tablet or full laptop mode. It's the first fully rugged 2-in-1 to work in extreme conditions.

Built to withstand up to 4-foot drops, shocks, vibration, humidity, rain and more. The groundbreaking 3:2-aspect detachable screen improves display of programs like computer-aided dispatch (CAD), responds to glove-touch, and is viewable in rain, sunlight or at night to give your officers clear access to information anytime.

Panasonic TOUGHBOOK FZ-G1

This 2.4-pound ultraportable Windows®-powered tablet is tough enough to throw in a satchel and go, but powerful enough to access all the department data and apps officers need. The 10.1-inch screen is daylight viewable, comes with a warm-swappable battery and operates with gloved multi-touch technology. Thanks to options for magstripe and 2D barcode readers, your officers can accurately check driver's license information to autopopulate citation forms and send digital copies back to HQ.

Panasonic TOUGHBOOK FZ-N1

This fully rugged handheld can withstand a 7-foot drop and weighs in at 9.6 ounces. It's a slim, ultraportable tool with a powerful octocore processor powered by Android®. The angled rear-facing barcode scanner, camera, video and speech-to-text features are ideal for multiple policing tasks, including checking drivers' licences and eticketing. And the patented rain-sensing and glove touch-enabled screen and dual 100-decibel speakers with noise and echo cancelling are essential for loud or outdoor environments. Includes a longerlife and quick-charging swappable battery and will be available soon with enhanced push-to-talk (EPTT) capabilities for even easier communications.
