

NURSE CALL SYSTEM BENEFITS FOR PATIENTS

As baby boomers continue to live longer than ever, the demand for efficient and reliable technology continues to rise. Panasonic's state-of-the-art Nurse Call System (NCS) is a sophisticated technology that allows patients and residents to feel safe and live well.

- Reduce response time for patients with Panasonic's efficient communication devices, including a high-voice quality, two-way communication, one-touch button system.
- Allow patients to remain active with Nurse call pendants and never lose sight of them with tracking technology.
- Keep patients informed with the Resident Event Notifications feature.
- Reduce response times with "callback to the room" feature and wireless call placement to their remotely located healthcare provider.
- Keep residents safe with door, window, water, and fire sensors while maintaining their privacy.
- Provide better care and meet patient needs with upgraded technology.
