

PANASONIC NCS BENEFITS FOR CARE PROVIDERS

Canada's increasing aging population is placing a burden on healthcare facilities, raising the need for nurses who are already overworked. Whether in assisted living facilities, nursing homes, small hospitals or other medical offices, Panasonic's Nurse Call Solution (NCS) is a smart, efficient, and responsive healthcare solution that helps nurses and administrators stay productive while improving the quality of patient care.

- Benefit from a seamless and flexible healthcare solution that includes digital terminals and wireless handsets for hands-free, staff-to-staff communication.
- Optimize communication between care provider and their charge with convenient one-touch speed dial, facility information, and food and drink menu playback buttons.
- Optimize remote patient calls and help care providers better manage their time with wireless NCS technology that allows them to prioritize, manage, or cancel calls on-the-go.
- Allocate staff more efficiently and reduce alarm fatigue with streamlined technology.
- Increase productivity with enhanced workflows and eliminate unnecessary walk-ins with time-saving systems such as targeted alarms, and resident event notifications.
- Improve level of care and speed up call responses with readily accessible patient information.
- Improve job satisfaction and reduce care provider stress, fatigue, and high turnover.
