

Mobile Computing Solutions & Services

From shop floor to warehouse, on the road or in the field, Panasonic is helping organizations keep moving forward. Engineered to withstand drips, drops, dust and grime, Toughbook notebooks and Toughpad tablets thrive and survive in the harshest of environments. Panasonic is committed to delivering mobile computing solutions that help you get the job done, wherever it takes you.

- Panasonic is the only major manufacturer that designs, builds and tests its mobile devices in its own factory - allowing quality control, consistency and parts availability to be monitored every step of the way.
- Select Toughbook and Toughpad mobile devices go beyond the standard safety testing to achieve ANSI 12.12.01-2000 certification.
- Panasonic and its partners design a wide assortment of heavy-duty docks, mounts and other peripherals—including barcode scanners, printers and magstripe readers—to expand and enhance the Toughbook and Toughpad capabilities.
- Panasonic values keeping backward compatibility to allow customers to save the expense and hassle of replacing vehicle docks every time a new model is introduced.

INDUSTRY AVERAGE FAILURE RATE

Panasonic computers are over five times more reliable than the average computer used by businesses across America.*

*Comparing Panasonic actual data for Toughbook computers to PC Magazine reader-reported data for competitors.

Not only is a Toughbook purpose-built to withstand extreme mobile environments, but it has the exclusive Panasonic ProServices support team standing behind it. To help ensure uninterrupted worker productivity and efficiency, Panasonic offers support and services throughout the lifecycle of your mobile computing device.

Panasonic ProServices include:

- Pre-deployment consulting
- Engineering design and field engineering expertise
- Deployment services (imaging, asset tagging, etc.)
- Warranty coverage and maintenance services
- Mobile Security Services
- Mobile Device Management
- Hard drive replacement

TOUGHBOOK

TOUGHPAD
