

ATTUNE

Drive-Thru Communication System

The next generation of noise-cancelling drive-thru communication solutions from the leaders in durability.

Transform a noisy operation into an oasis of calm, with 1.9 GHz of DECT Frequency.

DIGITAL NOISE CANCELLATION IN A SLEEK AND DURABLE HEADSET

From the leaders in rugged technology

Attune communication systems protect against the noisiest environments. With the most advanced digital noise reduction (DNR) technology available, Attune II incorporates three microphones to block unwanted background and burst noises like chatter, ice machines and even outside sirens, airplanes and trains. So now your employees and your customers can hear each other... and nothing else.

SIMPLE AND EASY TO USE

Built to work seamlessly with your drive-thru operation

With just four buttons, communication is simple and easy...one button to talk, one button to change volume, one button to page and only one button to change lanes to a second, optional lane.

KEY FEATURES & BENEFITS

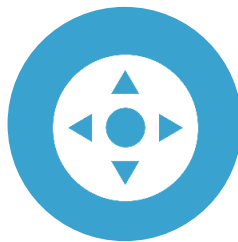

DECT TECHNOLOGY

DECT DNR (digital noise reduction) uses a 3-microphone array to cancel ambient noise

ERGONOMIC & SANITARY DESIGN

Weighing less than 100g - with sanitary rubber pads, not foam

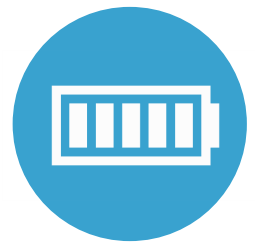

4- BUTTON OPERATION

Simplicity means a shorter learning curve for crew

ORGANIZED OPERATION TAGS

Colored tags distinguish each unit by drive-thru lane

PANASONIC BATTERY

Long-lasting reliability from the industry-leader

DYNAMIC NOISE SUPPRESSION

ENHANCE YOUR DRIVE-THRU OR CURBSIDE PICKUP

Typical noise suppression eliminates low-frequency, steady, hums like droning fans and idling freezers. Attune suppresses all of those, plus sounds across the spectrum, including sounds that change in pitch and volume like sirens, beeping horns and kitchen chaos. Empower your staff members to speak with customers in a digitally enhanced quiet zone where they can communicate efficiently and get orders right the first time.

TRUSTED DURABILITY

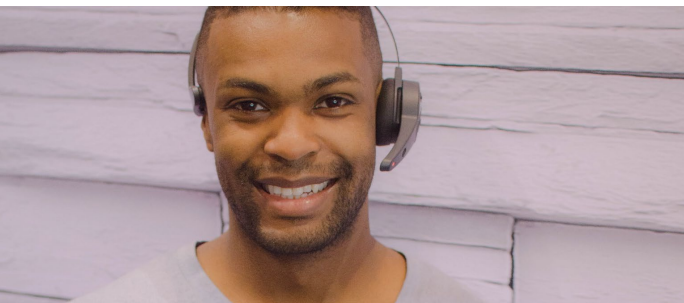

FROM THE INDUSTRY LEADERS IN RUGGED

We build Attune systems with screws, not glue, so it's easy to disassemble and repair, if necessary. Benefit from completely sealed surfaces with seamless gaskets that keep out dirt, grease and water to protect against corrosion and short-circuiting.

COMFORTABLE AND CLEAN DESIGN

WITH EASY OF OPERATION IN MIND

Every button features raised surfaces that make it easy for employees to put their fingers on the right functions. With a lightweight design at under 100g, Attune II also features rubber pads – which unlike foam pads, are easy to wipe down and keep sanitary.
