

Smart Locker

Smart Locker technology from Panasonic provides guests with an easy and secure option to pick up off-premise orders at peak freshness, all in a dedicated space.

Empower your customers through a dedicated take-out solution for the fast-growing off-premise dining segment.

THE NEXT GENERATION OF TAKE-OUT ORDERING

Panasonic provides the latest technology in meals to go, which offers the ability for a customer to order and pre-pay through a mobile app or stationary ordering kiosk. The cubby wall is available with rear or front-loading, where the system software selects the appropriate cubby that can be hot, cold, or ambient. Once the cubby is loaded, a code can be sent to the customer which will direct them to their designated cubby. It can then be easily opened for order pick up.

CONTACTLESS CARRY-OUT SIMPLIFIED

3 EASY STEPS

- 1 LOCKER IS LOADED**
Restaurant's runner loads the food locker unit with an order and assigns the locker to the corresponding customer
- 2 CUSTOMER IS ALERTED**
Panasonic's custom-tailored software notifies the customer their order is ready and provides locker access instructions
- 3 UNIT IS UNLOCKED**
Upon arrival, the customer enters the code provided in the locker access instructions and is able to retrieve their food

12' x 12' unit

INTEGRATED PICKUP

EASY TO ADD INTO YOUR EXISTING SPACE

Install in a restaurant or communal space and create a dedicated area for take-out orders. In a fast-casual setting, a Smart Locker bank can eliminate any bottleneck in dine-in or counter service operations. In a communal setting, with a bank of Smart Lockers, the delivery is housed in the hardware, increasing the building's safety.

NO MORE ORDER CONFUSION

CUSTOMERS CAN ONLY ACCESS THEIR SPECIFIC LOCKER

No more upset phone calls from customers who grabbed the wrong brown bag off the bookcase because they couldn't read the receipt stapled to it. Smart Lockers can only be opened by the customer with the corresponding order code. Simply scan the code and your locker will open. Once you take your food and close the door, the process is complete.

PLATFORM AGNOSTICS

A SEAMLESS INTEGRATION

Our Smart Locker hardware integrates with your native ordering system, as well as popular app-based delivery platforms.
