

# Breathe, feel, and live well

with the only complete, smart  
solution for indoor air quality.

## Protect Your Home and Family from Dangerous Mold and Mildew

The #1 source of humidity in the home comes from your bathrooms and laundry room. Pairing Swidget smart controls with Panasonic ventilation fans prevent harmful allergens like mold and mildew and protects:

### Your Health

High humidity can negatively affect human health by increasing the likelihood of heat stroke, heart problems, asthma, and other respiratory problems.

### Your Home

Condensation on your windows and walls can lead to long-term structural weakening and damage to your home.

## WORKING TOGETHER

### Panasonic

Breathe confidently with air that is always fresh. Powered by Breathe Well, The Only Complete Air Quality Solution™, our energy recovery ventilators (ERV) and ventilation fans circulate fresh air to your indoor spaces and cycle out damp, stuffy air.

### SWIDGET

Swidget Smart Controls can be added to a wide range of Panasonic ventilation and air conditioning solutions to ensure you are breathing the highest quality air. Swidget has a variety of sensors that monitor motion, temperature, humidity and air quality.

Swidget Smart Controls detect unhealthy air and automatically control Panasonic's Breathe Well technology, enabling it to remove the unhealthy or contaminated air.

24 hours a day, 365 days a year, you can rest assured that the quality of the air you're breathing is always fresh and healthy.

## Empower your home to ensure you are breathing clean, fresh air
